International Mini-Z Masters Prague 2022

Technical Rules

Version: 1.2 – (updated 01.07.2022)

GENERAL RULES

Body Modifications:

Bodies may be functionally modified with minimal effect external appearance. The following non-comprehensive list of body modifications are allowed with exception for **Box Stock and 2WD HM class**:

- The rear of the car may be removed up to Maximum 20mm from the ground.
- Wheel wells may be cut forward or backward to accommodate different wheelbase chassis.
- Wheel wells may be cut or chamfered internally for tire clearance.
- Lower portions of the body may be cut for ground clearance in front, sides or rear.
- Body material may be shaved or thinned internally for weight reduction. Technical inspection
 officials reserve the right to disqualify any modified body deemed to be too fragile due to
 excessive material removal.
- Body panels may be reinforced or strengthened internally without affecting external appearance.
- Original windshield and windows must be installed but can be modified by cutting unexposed internal areas.
- Original headlight covers must be installed, but headlight buckets may be removed or omitted. In the event of a headlight cover is lost, the hole may be covered with a decal.
- Taillights and taillight covers may be removed or omitted.
- Small body parts such as mirrors, canards, exhausts may be omitted or removed to prevent racing damage and debris on track.
- All rear wing comes with the body may be installed according to the no height limited.
 Custom wings allow to use on the body, according to the height limited 45mm from the ground.
- It is forbidden to tape the body to chassis or use other means to mount body other than with original body holders

The above list is non-comprehensive. The purpose and spirit of the rules is to allow functional performance modifications to the body while preserving the scale appearance and realism. The technical inspector has final authority in the judgment of body modification legality.

If you have modified your body and have questions regarding the legality of the modifications, please submit the body in question to technical inspection PRIOR to racing qualification or main event round. This is in order to prevent any inadvertent disqualifications.

The technical inspector will judge the legality of body modifications and photograph the body in its legal state if necessary.

If the body is further modified post-inspection, the modifications may or may not be legal. For the racer's protection, please re-submit the body in question to technical inspection IMMEDIATELY if significant modifications are made.

If the body is damaged, the condition of the body may or may not be legal. For the racer's protection, please submit the body in question to technical inspection IMMEDIATELY if significant damage occurs. If the damaged body is judged illegal, it must be repaired or replaced for the next qualification or main event round. Qualification or main event results during which racing damage occurs on track will be allowed, as long as the body is not judged to be intentionally designed to break away to benefit performance.

Tires:

No tire insert use. No traction compounds allowed on tire or on race surface. Tire warmers are allowed. Tires may be cleaned with a 70% alcohol solution. If a driver uses tire cleaner that has been deemed illegal, the driver will be subject to any penalties that apply.

Mini-Z Box Stock

Chassis	Kyosho MR-01, MR-015, MR-02, MR-03 (Sport, RWD, EVO)
Electronic	Only original Kyosho/Kopropo PCB! Changes to the MOSFET, other modifications and soldering of any connections that are not originally soldered is not allowed.
Motor and Gear Ratio	Kyosho MZ9P and MZ9E. Opening motor and changes to the motor will result in disqualification. Only Kyosho Gear differential is allowed
	Gear ratio - Max. pinion 9t spur gear 44t by 48DP (4,888)
Rims and Tires	Front max. width 8.5 mm and diameter maximum 20mm Rear maximum width 11 mm and diameter maximum 20mm
	All wheel rims must be original design made for Mini-Z RACER, any modification is not allowed, any slot-car design wheel and 3D print wheel not allowed. Wheels must fit inside the body and must not exceed body outline.
	Any Brand of Rubber Mini-Z production tire ONLY. (PN, MARKA, KYOSHO, etc.) Homemade tires, Foam tires, Silicon tires, Urethane tires, Ethyl Carbamate tires NOT allowed.
Body	Kyosho Autoscale, TRP, Route246 only. LM bodies not allowed Lexan bodies and 3D printed Bodies are not allowed. Lexan windows, lexan wings or 3D printed wings are not allowed.
	It is allowed to use 3D printed body holders and side body holders, all parts must be made of plastic and should be a replica of original part.
Weight and Dimensions	Maximum Width — 80 mm Maximum Length — 180 mm Wheelbase — max. 98mm Minimum weight with batteries — 170 g
Optional Parts	T-Plate, ball bearings, wheel nuts, aluminium front knuckles 0°, aluminium steering rod 0°, front suspension springs.
Batteries	AAA NiMH 4pcs
Other rules	Minimal ride height with batteries and body attached is 1,2mm

2WD Stock

Chassis	Any commercially available
Electronic	Any commercially available
